

OVA 70 | by IsoNova

Concentrated egg protein

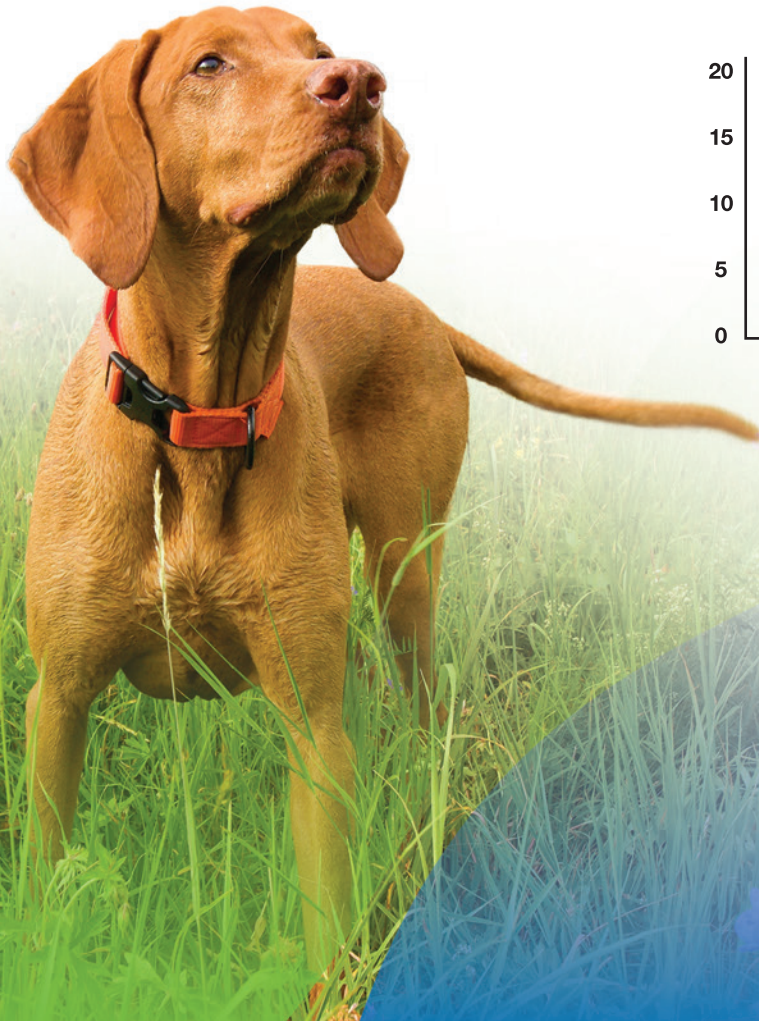

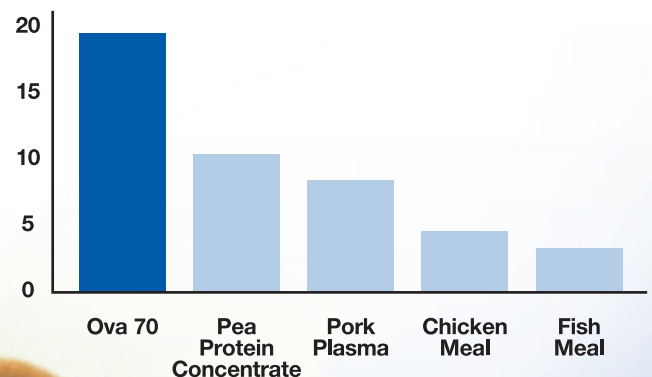

Egg protein sets the quality benchmark for all other proteins used in pet foods and pet treats. With Ova 70, IsoNova gives you more egg protein pound for pound. Ova 70 lets you pack more protein into your products without having to worry about high levels of ash or fat.

Ova 70 Benefits:

- Protein quality that sets the standard for the industry
- 70% protein minimum
 - 50% more protein compared to whole egg
 - Balances the amino-acid profile of your formulas
 - Boosts total protein, in a label-friendly way
- More than 50% lower in fat compared to whole egg
 - Easy incorporation in high-protein formulas without adding excess fat
 - Better control over fat addition in your production process
- Industry-leading 18:1 protein-to-ash ratio (typical analysis)
 - Load your cat foods and puppy diets with protein, not with ash
 - Better total-formula ash control
- Pasteurized
- Shelf-stable
- Increased binding power compared to whole egg

Protein-to-ash ratio of Ova 70 samples compared to samples of other protein sources.
