Egg Product

THE BUDGET-FRIENDLY, HIGH-QUALITY, SUSTAINABLE NUTRIENT SOURCE FOR WHOLESOME SHRIMP AND FISH FEED

Egg protein is the standard by which all other protein ingredients are measured. The application of quality egg products goes beyond terrestrial species – ***what's nutritious on land is nutritious in water!***

The amino acid profile of egg meets the needs of shrimp and fish better than any meal or alternative protein ingredient. What's more, shrimp benefit because egg is a natural source of cholesterol and phospholipids – critical components for proper shrimp development.

Using Ova 46 egg product in your formulas helps reduce your reliance on fish meal as well as the cost of your diets, all while improving the overall sustainability of your supply chain.

Simply put: Ova 46 whole-egg product is your shrimp and fish feed solution.

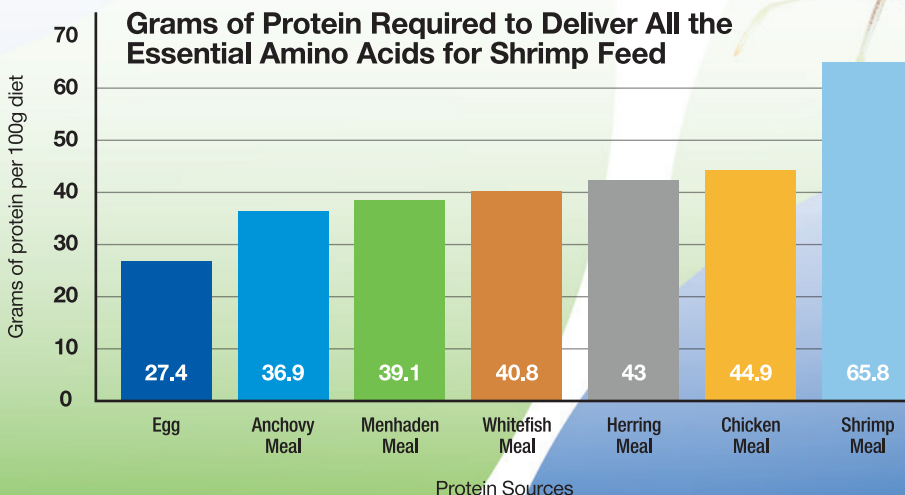

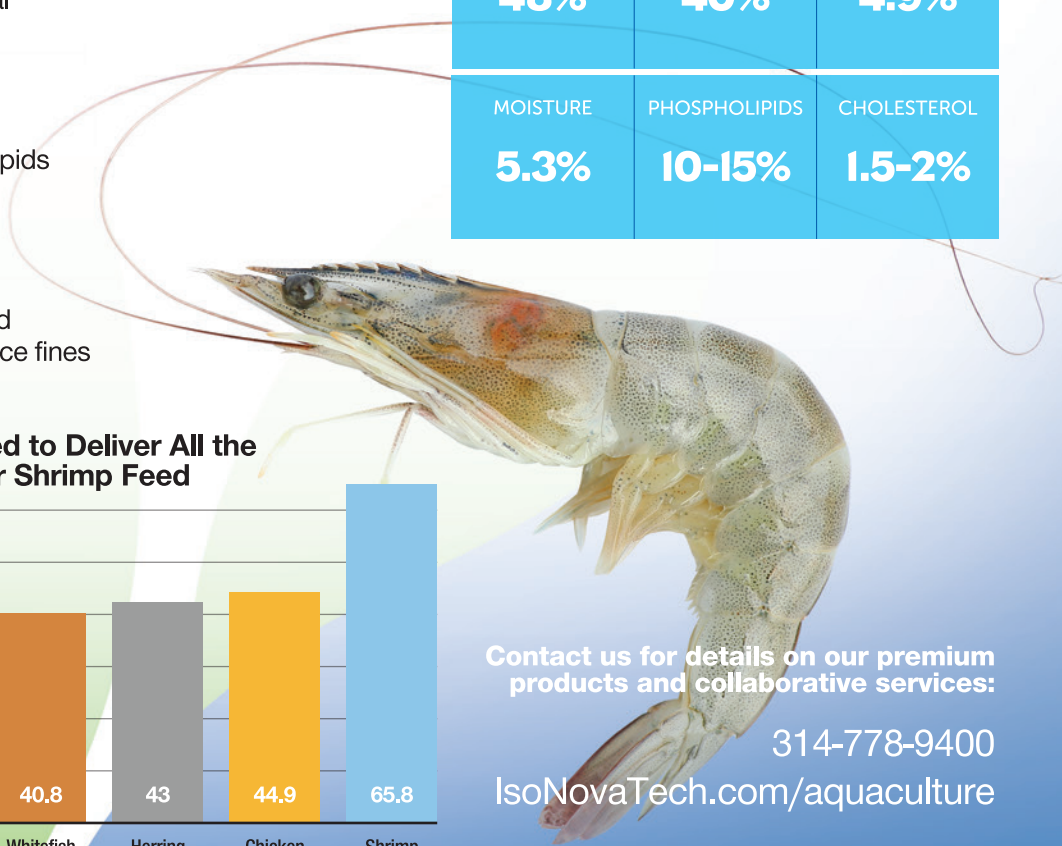

Benefits:

- Industry-leading amino acid profile for all aquaculture diets
- Rich in natural phospholipids and cholesterol
- Reduces dependence on fish meal
- Helps optimize feed cost
- Reduces reliance on synthetic cholesterol and purified phospholipids
- Easy formulation and use in any mash, pelleted, or extruded feed
- Natural binding ability for improved pellet quality and potential to reduce fines

Typical Analysis:

PROTEIN	FAT	ASH
48%	40%	4.9%
MOISTURE	PHOSPHOLIPIDS	CHOLESTEROL
5.3%	10-15%	1.5-2%
